## TECHNICAL SKILLS

---

**Technologies:** Node.js, Express.js, Socket.io, Next.js, React, Redux, Docker, Tailwind, HTML/CSS, Git  
**Databases:** MySQL, MongoDB, Redis  
**Tools:** Postman, Apache ab  
**Cloud Services:** AWS S3, AWS Elastic Search, AWS EC2

## EXPERIENCE

---

### Full-Stack Developer

March 2023 – Present

*Knowello*

*Mumbai, MH*

- Took full ownership of designing and developing a Content Management Website independently, utilising Next.js, Node.js, MySQL and React Query for efficient data fetching and management.
- Deployed containerised applications using Docker on an EC2 instance. Utilized Docker Compose and GitHub Actions to automate the process of integration and deployment of new features and modules
- Integrated Amazon S3 bucket to serve as a hosting solution for application assets.
- Implementation of Firebase Cloud Messaging for in app messages and push notifications.
- Used Redis to divide workload on database by identifying frequently requested data and storing it in memory instead of fetching it every time from database. Scheduled a cron job every 1 minute to update and refresh the data present in memory.
- **Tech Stack:** Node.js, Express.js, Socket.io, Next.js, Docker, MySQL, MongoDB, Redis, FCM, JWT, S3, Elastic Search, Apache ab, Cypress.

### Full-Stack Developer

January 2022 – February 2023

*Darwin Platform Information Technology*

*Mumbai, MH*

- Created RESTful APIs for multiple projects, utilising Express.js and interfacing with MySQL database to store and retrieve data efficiently.
- Used React.js for HR Management system along with useContext for user authentication and state management
- Implemented JWT (JSON Web Tokens) for user authentication.
- Collaborated in developing cross-platform e-commerce application using React-Native
- Implemented Redux for managing the state of user authentication, shopping cart, and address information.
- **Tech Stack:** Node.js, Express.js, React, React-Native, MySQL, JWT, Redux, React Router, Tailwind.

## OTHER PROJECTS

---

### Itslets

Store

*React-Native mobile application*

- Complete responsibility of handling front-end functionality of the application.
- Integrated PhonePe payment gateway for in app transactions.
- Used Redux and Async-storage for maintaining user state and details.
- Setup of Firebase Cloud Messaging and integrated into the application for push notification.
- **Tech Stack:** React-Native, Phone PE sdk, Redux, Async-storage, Axios, FCM, React Router.

## EDUCATION

---

### Thakur College of Science and Commerce

Mumbai, MH

*Master of Science in Information Technology*

*2019 – 2021*

### Ganshyamdas Saraf College

Mumbai, MH

*Bachelor of Science in Information Technology*

*2016 – 2019*
